Patient Consent for Cold Laser Therapy

What is Cold Laser Therapy?

Cold Laser Therapy is an alternate therapy which uses innovative technology to deliver light energy to tissue, which reduces pain and inflammation.

What to Expect

The Cold Laser Therapy protocol involves between 2-3 treatments per week until symptoms resolve.

How effective is Cold Laser Therapy?

Cold Laser Therapy has a 50%-70% success rate reported but no large long-term studies are currently available.

Does it hurt?

No. Typically, no pain is noticed during treatment, but you may notice a warm sensation.

The cost is \$95.00 per treatment. Payment is due at the time of service.

The treatment is not billable to insurance.

By signing below, I have read the above information and understand that I am consenting to Cold Laser Therapy, and I am responsible for payment of all costs for the treatment.
